

## PRE-SCHOOLS

SCOH (*Stichting Christelijk Onderwijs Haaglanden*) is a foundation comprising pre-schools, primary schools and schools for children with special educational needs.

We currently run 21 pre-schools that prepare children for primary school education. We provide a safe, secure and supportive environment for children to learn through play, discovery and exploration. Our teachers are experienced in organising a wide range of activities with a clear focus on language development.

[Practical information](#)

### Ready for primary school

Your child's development is of the utmost importance to us. Children in pre-school learn through play, discovery and exploration. You will be able to see their progress at home. The teaching staff at our primary schools notice it, too. Children who have attended pre-school have larger vocabularies and recognise the language used in Group 1.

### Safe, secure and supportive

Our caring and dedicated teachers are committed to your child's development. They give the children all the attention they need. Our teachers create a safe, secure and supportive environment where everyone feels welcome – parents included.

### From pre-school to primary education

Our pre-schools and primary education are located in the same building. In most cases, children who have attended pre-school with us automatically move up to Group 1 at our primary school. This means they stay in familiar surroundings and can start primary school surrounded by their friends. It makes the transition much easier for them
